[Word For Mac 2017 Freeze](#)

If like me you often need to work on your documents or sheets later remember to re-start Sugarsync before you shut down otherwise your files won't be synced for the next time you want to use them.. Spanish accents in word 2004 Hi MacBookReboot, I have a similar issue with word 2004.

Is working fine for the moment But I like the option I had to uncheck Other people were suggesting this, but I am not sure is my case: Does anyone have a similar issue with the spanish accents? Right click in Office and Sugarsync Anyone using Office for Mac progs such as Excel or Word and Sugarsync will have been frustrated by the computer hanging when you right click.

After installing the August 8, 2017, update for Word 2016 (KB3213656) or the September 5, 2017, update for Word 2016 (KB4011039), you may encounter the following issues: If you merge vertical cells in a table, the cell content disappears, and you can't select the merged cell. The screenshot shows a software download interface. On the left, there's a 'Your vote' section with five stars, a 'User rating' of 4.3 (482 votes), and an 'Editor rating' of 5 (excellent). Below that is an 'overall score' of 7.7 and an 'Award Winner' badge. In the center is a large blue 'Start Download' button. To the right of the button is a profile picture of Clyde Redding, Senior editor. On the far right, a 'Ranking' graph shows a line fluctuating between 330 and 344 from August 17 to September 15. Below the graph, it says 'Downloaded: 8,336 times' and 'Used by: 5,193 people'. A small 'Hp' logo is visible at the bottom right of the screenshot.

I am using the spanish language settings, and the document I am working with freezes any time I type an accent.. It's crazy, and annoying too, as I have to force quit and loose part of what I have typed.. I don't have SugarSync installed though I found a solution suggesting uncheck 'Check spelling as you type' that I have just done.. I've posted a ticket with Sugarsync but I'm sure they'll already know about the problem.. The solution is not to Force Quit - you'll lose whatever you were doing Just quit Sugarsync and it will sort itself out with the right click drop down menu appearing.
